OFION AGRISCIENCE

DANGER I Direct contact with eyes can be damaging KEEP OUT OF REACH OF CHILDREN

CEC & ME **ADJUVANT**

To improve spray coverage for a range of plant growth regulators and crop protection products.

Polyalkoxylate siloxane.

5 Litres

10/03/17 12:08 pm

MEGAWET 5L 140X140 indd 1

(

PLEASE READ THE LABEL COMPLETELY BEFORE USE

DANGER:

May be harmful if swallowed or inhaled. May cause mild skin irritation and serious eye damage from direct contact. Toxic to aquatic organisms. **PRECAUTIONS**

STORAGE: Keep out of reach of children. Store in the original container in a secure place.

PERSONAL PROTECTION: Avoid contact with eyes and skin. Avoid inhalation of spray mist. When mixing or applying, wear overalls, boots, gloves, and eye protection. Clean protective clothing daily after work. Do not eat, drink or smoke while using. Remove protective clothing and wash hands and face thoroughly before meals and after work.

DISPOSAL: Dispose of this product only by using in accordance with this label. Triple rinse container and add rinsate to the spray tank. Dispose of container to a suitable landfill or agricultural recycling scheme.

ENVIRONMENTAL: Use this product carefully. Do not contaminate aquatic environments with product, spray drift or empty container. Do not allow spray drift outside the target area to occur.

First Aid

If swallowed do not induce vomiting. If splashed in eyes, wash out immediately with running water for several minutes. If skin or hair contact occurs, remove contaminated clothing and wash with soap and running water. If inhaled, immediately move to fresh air and rest. Maintain half upright position if breathing is difficult. Call the National Poisons Centre **0800 POISON (0800 764 766)** (24 hrs) or a doctor immediately for advice.

Emergency Response

In a transport emergency call 111, Police or Fire Brigade. For specialist advice call 0800 ORIONAS (0800 674 6627).

Spillage

Exclude non-essential people from the area. Wear protective clothing and prevent material from entering waterways. Absorb spill with inert material such as soil, sand, etc, and place in a waste container. Wash area with water and detergent, and absorb with further inert material. Dispose of safely to a suitable landfill.

Active Ingredient: Polyalkoxylate siloxane

CAUTION: This product should be used with caution as it can increase the risk of crop damage. Carefully check the primary product label for compatibility and directions for use. Any directions given on the primary product label will take precedence over directions given on this label. Before spraying any untried mixes, always check beforehand for crop phytotoxicity.

D.O.M:

MEGAWET

GENERAL INFORMATION

Megawet is an organosilicone product specifically formulated for use with insecticides, fungicides, plant growth regulators and plant nutritional products in a range of arable and horticultural crops. Megawet should not in general be used with selective herbicides unless specifically authorised (see notes below). Megawet enhances spray coverage, spray deposition, and spray retention. Megawet allows water rates to be reduced, and is particularly useful in low water volume and aerial spraying. Unlike many organosilicones, Megawet does not cause stomatal infiltration that can otherwise damage the crop.

RATES OF APPLICATION

Water Rate per ha	Megawet mL per 100 L
< 100	125 - 300
100 - 500	50 - 125
> 500	10 - 50

Use the higher rates of Megawet in the range where

- The crop is hard to wet e.g., brassicas, cereals, pasture
- The crop has a dense canopy or thick foliage

The rate of companion chemical(s) is high, e.g., > 4 L or Kg per Ha
The use of standard or high water rates with Megawet is not recommended
as it can result in excessive run-off and reduced performance.

HERBICIDES

Maize (Post Emergent Spray Only): Use 100 mL/ha of Megawet in 100 L/ ha water. Do not use pre-emergent.

Other Crops: As Megawet can reduce selectivity, do not use with herbicides on other crops unless local experience has shown it to be safe, or advice has been received from an Orion AgriScience representative.

MIXING

Add Megawet to partly filled spray tank after the addition of the primary product. Maintain agitation through filling and spraying.

COMPATIBILITY

Megawet is compatible with most commonly used insecticides, fungicides, plant growth regulators and plant nutritional products. Do not mix with products such as a Bordeaux mixture or lime sulphur, or with other products that have a high alkalinity. Avoid use in spray solutions with a pH below 5 or above 9. Do not mix with spray oils as increased crop damage may occur.

™Megawet is a Trade Mark of Orion AgriScience Ltd.

Distributor: Orion AgriScience Ltd, Unit 1, 15 Sir Gil Simpson Drive, Harewood, Christchurch 8053. **www.orionagriscience.co.nz**
